Subject: Atlantic gas pipeline

Governor Cooper,

I am a North Carolina resident and I support the building of Atlantic Coast natural gas pipeline. While we need to eventually ween ourselves off carbon-based energy sources, switching from coal-generated electricity to gas-generated electricity provides some short-term relief. So, if the purpose of the pipeline is to accelerate that transition, it seems like a reasonable idea to me.

I hope the Governor will continue to advocate for renewable energy sources, and the legislature will provide incentives and investment to encourage renewable energy.

Respectfully,

Nils Brubaker

Chapel Hill, NC
